HyO-Tec is an industrial company specializing in the design and manufacturing of hydrogen generators in order to revolution industrial processes by offering innovative, sustainable and efficient hydrogen solutions.

HyO-Tec's goal is to provide impeccable products and services, guaranteeing quality and service.

As Manager of HyO-Tec, I am therefore committed to developing a policy of continuous improvement of our Quality Management System, in full compliance with the requirements of our customers and interested parties, in accordance with the ISO 9001 :2015 standards regulations.

Concretely, our policy is structured around these strategic axes :

- Continunous improvement of customer satisfaction.
- Comply with legal and regulatory requirements.
- Make the Quality Policy available to relevant interested parties.
- Ensure continuouns improvement in the performance and efficiency of the organization and the management system with a reactive and regular review.
- Ensure the availability of the necessary resources to guarante this commitment.

In this context, management undertakes to ensure the availability of the skills and resources necessary to maintain this policy.

To do this, our Quality Management Manager will ensure the sustainability of the system and improve our efficiency.
